IP66/IP68 **1/21**

A rugged tubular light fixture designed for use in potentially explosive atmospheres in ATEX Zones 1/21. The housing is made of highly durable polycarbonate tubing. The luminaire's end caps are made of a special glass-fiber-reinforced plastic and, together with a silicone gasket, ensure high resistance to water spray and dust (IP66), as well as resistance to submersion (IP68) up to 15 m and high impact resistance (IK10. Equipped with certified electronic components—the encapsulated LED module and driver ensure high efficiency and a service life of up to 85,000 hours for the LED modules, even at high temperatures. Suitable for ambient temperatures ranging from -20 °C to +55 °C (depending on the luminaire variant). The luminaire is mounted on a ceiling or wall using plastic or stainless steel brackets.
